PROFESSIONAL SUMMARY

AI Engineer and full-stack developer with hands-on experience building production AI systems and scalable web applications using Python, React, and modern LLM tooling (LangChain, AWS Bedrock). Currently architecting AI-powered features handling real-world user traffic at Selsoft Inc, while completing a B.Tech in Artificial Intelligence and Data Science. Comfortable owning a feature end-to-end — API design, cloud deployment, and model integration — and looking to bring that ownership to a fast-moving product team.

SKILLS

Languages: Python, JavaScript, TypeScript

AI / ML & LLMs: LangChain, AWS Bedrock, LLM API integration (Groq), Scikit-learn, Pandas, NumPy, Matplotlib

Backend & APIs: Node.js, Express.js, Flask, Django, FastAPI, REST APIs, Socket.IO

Frontend & Mobile: React, React Native (Expo), HTML, CSS, Vite

Databases: MongoDB, PostgreSQL, Prisma, Redis

Cloud & Tools: AWS, Vercel, Render, Git/GitHub, Postman, VS Code, Colab, Cursor

EXPERIENCE

AI Engineer — Selsoft Inc (Remote)

Oct 2025 – Present

- Architect and develop scalable AI systems capable of handling real-world user traffic, from data pipeline through deployment.
- Own DevOps responsibilities — CI/CD workflows, environment configuration, and release management — to keep systems reliable in production.
- Contribute to full-stack development as needed, partnering with product and engineering to ship features end-to-end.

Web Development Intern — Pinespher, NGP College

Sep 2023 – Nov 2023

- Learned production backend development with Django and PostgreSQL under senior engineer mentorship.
- Built and shipped small web applications and REST APIs as part of a collaborative engineering team.

PROJECTS

Meet-Sync — AI-Powered Meeting Assistant

May 2025 – Jun 2025

Co-Lead Developer · github.com/MUSTAFA892/Meet-Sync

- Built an AI meeting assistant that transcribes recordings and auto-generates TODOs, follow-up emails, and reminders triggered by spoken keywords.
- Designed the backend routing layer connecting Flask, Node/Express, and MongoDB to multiple LLM and notification APIs.

Tech Stack: React, Node.js, Express.js, Flask, MongoDB, LLMs (Groq), Postman

AI Resume & Interview Analyzer

Mar 2025 – May 2025

Co-Lead Developer · github.com/MUSTAFA892/Resume-Analyzer

- Built a tool that scores resumes for ATS compatibility and generates targeted, role-specific improvement suggestions using LLMs.
- Added a mock-interview simulator that tailors questions to a specific role and company via prompt-engineered LLM chains.

Tech Stack: Flask, MongoDB, HTML, CSS, Bootstrap, LLMs, Postman

PickleTime — AI-Powered Scheduling & Collaboration Platform

Nov 2025 – Present

AI & Full-Stack Developer

- Building AI-assisted scheduling and collaboration features across a web, mobile (React Native/Expo), and backend stack.
- Implemented real-time sync with Socket.IO and Redis/BullMQ-backed job queues; integrated Google APIs, Microsoft Graph, and Stripe.
- Used LangChain and AWS Bedrock to power in-app AI features while maintaining confidential internal architecture.

Tech Stack: React, TypeScript, React Native, Expo, Vite, Node.js, Express.js, Python, FastAPI, PostgreSQL, Prisma, MongoDB, Socket.IO, Redis, BullMQ, LangChain, AWS Bedrock, Google APIs, Microsoft Graph, Stripe

EDUCATION

Bachelor of Technology in Artificial Intelligence and Data Science

2023 – 2027

KGiSL Institute of Technology, Anna University · CGPA: 8.6 (4th Year)

LANGUAGES

Fluent in Hindi, English, Tamil, and Gujarati.
